QIB Sustainable Deposit Report 2025

Sustainable Deposit Report 2025

QIB continues to pursue growth through tailored, sustainable financing that meets the diverse needs of its clients. In 2025, the Qatar Central Bank issued its Sustainable Finance Framework, which applies to all banks in Qatar. The Framework defines sustainable finance, sustainability-linked finance, and Islamic-compliant sustainable finance, directing credit and investment toward environmentally and socially responsible projects.

QIB welcomes this clarity and has aligned its approach accordingly, ensuring its sustainable offerings are transparent, measurable, and Shariah-compliant. In line with Qatar National Vision 2030, the Bank supports high-impact projects in green buildings, pollution reduction, education, and healthcare.

As Qatar's sustainable finance market matures, QIB sees considerable room for growth. In 2025, the Bank extended its Sustainable Deposit offering to retail customers with the launch of the Sustainable Flexi Certificate of Deposit. Driven by the Retail Banking team's strong push, this attracted QAR 1.043 bn. in retail sustainable deposits.

QIB's existing Corporate Sustainable Deposits meanwhile rose to QAR 2.120 bn. by year-end 2025, supported by the Treasury Department's proactive outreach to help clients understand sustainable finance and the options available to them.

QIB matches its sustainable deposit balances against eligible, Shariah-compliant financing exposures. The total of QAR 3.163 bn. in ESG deposits was allocated according to the eligible assets available during the reporting period, in line with QIB's internal sustainable finance criteria.

Sector	Value Allocation (bn. QAR)	Allocation
Renewable Energy	0	0%
Green Buildings	3.163	100%
Pollution Prevention and Control	0	0%
Essential Services (Healthcare & Education)	0	0%
SMEs	0	0%
Total	**3.163**	**100%**
